PROFESSIONAL SUMMARY

Results-driven ERP Business Analyst with over 5 years of experience leading full-lifecycle ERP implementations and driving enterprise digital transformation. Expert in aligning complex business requirements with scalable system architectures, specializing in Supply Chain Management (SCM), Manufacturing Routing, and Financial operations. Proven track record in orchestrating end-to-end business process mapping for Procure-to-Pay (P2P), Order-to-Cash (O2C), and Record-to-Report (R2R) workflows. Adept at bridging the gap between executive stakeholders and technical teams, leading requirements gathering, User Acceptance Testing (UAT), and organizational change management. Leverages strong capabilities in business intelligence, KPI reporting, and workflow automation to eliminate bottlenecks, optimize master data management, and deliver measurable business outcomes. Poised to translate deep functional expertise into Microsoft Dynamics 365 ecosystems to maximize ERP ROI.

CORE COMPETENCIES

Business Analysis & ERP Strategy

- Requirements Gathering & Functional Specifications
- As-Is / To-Be Business Process Mapping
- GAP Analysis & Feasibility Studies
- User Acceptance Testing (UAT) & Change Management
- Stakeholder Management & Process Optimization

Microsoft Ecosystem & Technologies

- Microsoft Dynamics 365 Concepts
- Power Platform & Power Automate (Workflow Automation)

ERP Functional Domains

- Supply Chain Management (SCM) & Inventory Control
- Procure-to-Pay (P2P) & Order-to-Cash (O2C)
- Manufacturing Routing & Production Planning
- Bill of Materials (BOM) & Material Resource Planning (MRP)
- Master Data Management (MDM) & Data Migration

Reporting & Analytics

- Power BI & Business Intelligence Dashboards
- KPI Reporting & Data Analytics

PROFESSIONAL EXPERIENCE

ERP Business Analyst / Production ERP Lead | **HORIZON SOURCING – Karachi, Pakistan**

May 2025 – Present

- ▶ Lead the end-to-end business analysis and deployment of a cloud-based Production ERP system, architecting master planning, inventory management, and advanced manufacturing routing workflows closely aligned with Dynamics 365 SCM methodologies.
- ▶ Facilitate extensive requirements gathering workshops with cross-functional stakeholders to document As-Is processes and design To-Be functional specifications for Bill of Materials (BOM) and Material Resource Planning (MRP).
- ▶ Conduct comprehensive GAP analysis to identify operational inefficiencies, resulting in the design of optimized Ratio Costing workflows that significantly reduced material wastage on the production floor.
- ▶ Orchestrate data migration strategies and oversee Master Data Management (MDM) initiatives to ensure absolute data integrity during the transition to the new cloud ERP architecture.
- ▶ Drive the creation of robust UAT frameworks, testing scripts, and comprehensive training documentation, leading successful change management programs to guarantee high user adoption across executive and operational tiers.

ERP Solutions Consultant / Business Systems Analyst | **KUBIX CREATIVE – Karachi, Pakistan**

August 2021 – Present

- ▶ Spearhead requirements elicitation and process optimization for the Apex Petroleum Finance & Billing ERP, streamlining complex Record-to-Report (R2R) and Order-to-Cash (O2C) workflows.
- ▶ Serve as the principal liaison between executive leadership and technical delivery teams, translating nuanced business challenges into clear, actionable functional specifications and user stories.
- ▶ Drive digital transformation by mapping and implementing advanced financial workflow automations, establishing scalable process frameworks analogous to Microsoft Power Automate and Logic Apps.
- ▶ Architect and deploy customized Power BI-style reporting dashboards and Business Intelligence tools, empowering executive stakeholders with real-time visibility into critical financial KPIs and operational metrics.

Digital Transformation Consultant / Systems Analyst | **HAMDARD UNIVERSITY – Karachi, Pakistan**

February 2022 – March 2025

- ▶ Directed enterprise-wide business process automation initiatives, consulting with academic and administrative department heads to capture requirements and resolve operational bottlenecks.

- Mapped complex institutional workflows to design and implement targeted automation solutions, significantly reducing manual data entry and enhancing overall stakeholder engagement.
- Led the transition from fragmented spreadsheet reporting to centralized, automated KPI management dashboards, establishing a unified source of truth for organizational data tracking.

MAJOR ERP IMPLEMENTATION PROJECTS

- **Horizon Sourcing Production ERP Implementation:** Led the business analysis and functional design for a comprehensive enterprise ERP deployment. Optimized supply chain workflows, enhanced BOM management, and delivered a unified system that streamlined end-to-end production planning and manufacturing routing.
- **Apex Petroleum Financial ERP & Workflow Automation:** Addressed critical delays in the financial reporting lifecycle by mapping out complex financial processes and translating requirements into a fully deployed workflow automation system for R2R and O2C cycles. Eliminated manual bottlenecks and improved cash flow visibility.
- **Enterprise Lead Management Automation:** Resolved data silos and inefficient routing by designing functional specifications and mapping a comprehensive digital automation flow. Replaced manual interventions with automated workflows, significantly improving operational throughput.

EDUCATION

- Master of Science in Computer Science (MSCS)**
University of Karachi
- Bachelor of Science in Computer Science (BSCS)**
Hamdard University
- Ph.D. in Computer Science (Ongoing) – Focus: Digital Workflows*

CERTIFICATIONS

- ✓ **Microsoft Dynamics 365 Fundamentals - ERP (MB-920)** (Pursuing)
- ✓ **Microsoft Power Platform Fundamentals (PL-900)** (Pursuing)
- ✓ Google AI & Machine Learning Professional Certificate
- ✓ Meta Full Stack Web Development Professional Certificate
- ✓ Python for Data Science & Machine Learning
